ELECTRONIC SYSTEMS

TCM

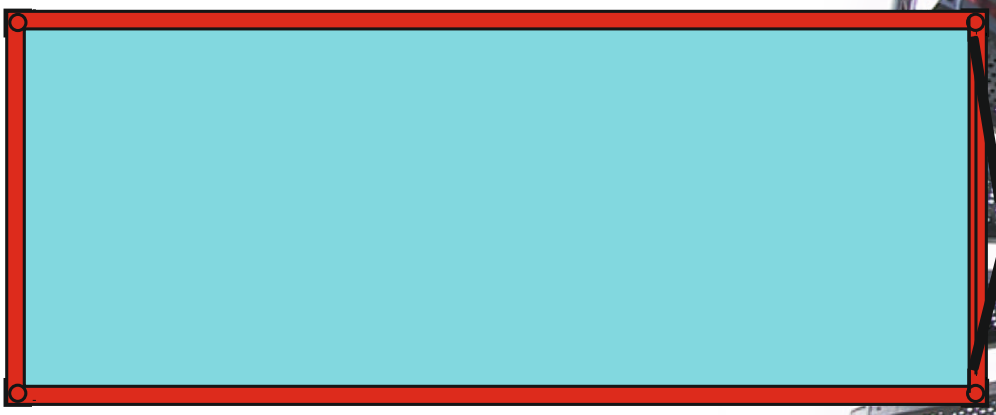
Application

module TCM with material serves as a base of mobile tower where all other necessary materials of mobile airport is stored:

- metallic balcony of the Tower module
- metallic balcony of the Briefing module
- circular stair of tower
- cables for the connections of containers
- holder for obstruction lights
- holder for meteorology equipment
- holder for reflectors
- holder for satellite TV
- holders for transceivers antennas
- aluminium ladder 3m
- chains for transportation of containers by crane
- spare paint and parts
- lighting
- socket

~ 2 400 kg

length		width		height
6058	x	2438	x	2591



SKU: **TCM.2. x x x**

Type series of container
Thermal insulation
N = normal thermal insulation (-30/+35 °C)
Execution
M = mobile execution
Voltage system
2 = voltage system 3 x 220 V/50-60 Hz
4 = voltage system 3 x 230/400 V/50-60 Hz
0 = other voltage system, must be specified
