

REL (Repair Easy Line) lights

- REL lights series are characterized by a carefully thought-out design, which focuses on easy reparability and maintenance
- we prefer commonly recyclable materials with a long lifespan, such as precious metals and glass
- due to availability of spare parts and their moderate price repair is much more suitable than the exchange of the whole product
- offering this range of products, we would like to provide our users with long and economical operation and maximal respect for the environment
- REL series products are marked by the following symbol

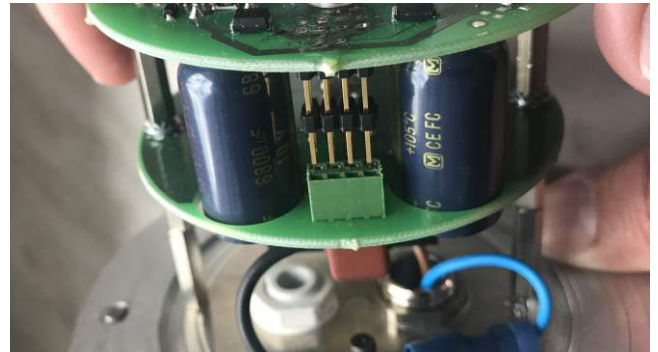

Catalog sheets and manuals contain user friendly lists of spare parts

The assembly and disassembly of the lights can be done by the most common tools

Connectors are preferred when connecting components

Modules and components include protective elements that prevent incorrect assembly

Service and repairs

- faulty electronic modules without mechanical damage can be sent for repair to Transcon address
- in out-of-warranty repairs, the price is dealt with according to a mutual agreement
- for most repairs, an employee who is professionally qualified according to the laws of the respective country is sufficient enough, there is no need for special training at company TRANSCON ELECTRONIC SYSTEMS, spol. s r.o.
- manual includes information regarding the repairs, in case of ambiguity you may consider the possibility of telephone or e-mail consultation
